EXPERIENCE SUMMARY

Full Stack Developer (MERN) - I am enthusiastic in learning new technologies and currently experienced in (NodeJS , ReactJS , ExpressJS , MongoDB , Redis , Sql , Socket.io , Google API's, Ansible , Docker Swarm , Html5 , Css3, Bootstrap , JQuery , AJAX)

SKILL SET

Jun-2018 ▶ SQL Server	1Year(s)	Jun-2018 ▶ JavaScript Libraries	1Year(s)
Jun-2018 ▶ Node JS	1Year(s) 3Month(s)	Jun-2018 ▶ React JS	1Year(s) 3Month(s)
Jun-2018 ▶ Express JS	1Year(s) 3Month(s)	Nov-2016 ▶ MongoDB	3Month(s)
Nov-2016 ▶ Docker	3Month(s)	Apr-2016 ▶ PL-SQL	1Month(s)
Apr-2016 ▶ Core Java	1Month(s)	Apr-2016 ▶ Java Swing	1Month(s)
Apr-2016 ▶ JDBC - Java Database Connectivity	1Month(s)		

TRAINED SKILLS

Oct-2016 ▶ Node JS	▶ L2	Oct-2016 ▶ MongoDB	▶ L2
Oct-2016 ▶ Express JS	▶ L2	Oct-2016 ▶ Angular JS	▶ L2
Jul-2016 ▶ Core Java	▶ L1		

DOMAIN

Jun-2018 ▶ MOBILE APPLICATION / PLATFORM	1Year(s) 1Month(s)	Nov-2016 ▶ TRAINING	4Month(s)
--	--------------------	---------------------	-----------

WORK EXPERIENCE

Total Experience - 01 years and 11 months

15/05/2017 - 04/06/2018 (INS-PJ-EVAP)

Role: DEVELOPER-L2

Domain: MOBILE APPLICATION / PLATFORM

Team Size: 4

Skills	Duration
SQL Server	1Year(s)

Node JS	1Year(s)
JavaScript Libraries	1Year(s)
React JS	1Year(s)
Express JS	1Year(s)

Description:

EVON is basically and Event Creation and Management application, which is suitable for both web and mobile. It gives user the ability to view all details regarding the event,register himself for the event,and check about confirmations. The application also provides discussion portal to chat with the other attendees of the event. Along with that the user can also book his accomodation and transportation through this. Along with managing, it also gives user authority tocreate any event and send invites to others for joining the event. The event creator can also send timely updates for the user during live event.

Responsibility:

Requirement Gathering,Wireframe Designing,UI Development,Database integration, Server side rendering, Testing

02/08/2016 - 14/11/2016 (ZIGGURATE)

Role: DEVELOPER - L2

Domain: TRAINING

Team Size: 6

Skills	Duration
Node JS	3Month(s)
MongoDB	3Month(s)
Docker	3Month(s)
React JS	3Month(s)
Express JS	3Month(s)

Description:

Ziggurate implies "build on a raised area".It gives the user a fabric like environment to deploy his applications.It provides Deployment-as-a-service and simplifies deployment,maintenance and monitoring of user applications.It has features like just-in-time scalability,load balancing,self-healing as well as proper monitoring of user's applications .Ziggurate is built for reactive micro-services.

Responsibility:

User-Interface Designing with Responsiveness.Middle-ware and Back-end tasks.Act as Scrum Master.

25/02/2016 - 11/04/2016 (FLIGHT RESERVATION SYSTEM)

Role: DEVELOPER - L1

Domain: TRAINING

Team Size: 5

Skills	Duration
PL-SQL	1Month(s)
Core Java	1Month(s)
Java Swing	1Month(s)
JDBC - Java Database Connectivity	1Month(s)

Description:

Flight Reservation System is basically flight management application which mainly had two modules. In it a user (if admin) can add the flights,add/update flight schedules, delete flights . Also a user(if customer) can check/view all the details of flights, book his tickets, cancel the tickets, check timings for all flights.

Responsibility:

Created some modules of UI, build the database tables, worked on functionalities like addition of flights,changing flight schedules,booking the flight and others.

Also , did the testing of all modules.
